California 911 System

CA 911 Outages		
Northern California	Central California	Southern California
No 911 Outages	No 911 Outages	911 Outages

911 Outages/Remote/Community Isolations:

On 12/05/17, the Frontier Santa Paula remote central office in Ventura County reported that 329 landlines had no dial tone due to power failure as a result of the Thomas Fire. Currently, these customers are unable to dial out to 911. However, wireless service is not impacted at this time. The Public Safety Answering Point (PSAP), Ventura County Sheriffs Office (VCSO), are taking calls normally and have been notified of the isolation.

- Per the CA 911 Branch on [12/16/17 at 0650 hours](#):
 - Per Frontier, the Topa Hut remote office has been temporarily restored through a microwave shot from the South Mountain.
 - Dial tone is restored for customers with access lines and wiring that is in tact.
 - Individual customers with damaged distribution lines are still out of landline service.
 - Destroyed lines and poles in the area will need to be repaired before service can be re-established fully.
 - Repair work is in progress, as some access to the affected area is now being granted.
 - [Frontier Communications teams continue to assess damage when allowed into affected areas and have replaced 13-poles thus far.](#)
 - [No ETTR has been provided at this time for full restoral.](#)

Service Interruptions:

Per the CA 911 Branch on 12/14/17 at 1844 hours:

Due to massive infrastructure damage caused by the Thomas Fire, the ongoing wireline community isolation in Santa Paula will not be resolved in the immediate future.

- A temporary microwave solution is being stood up in the area, however even with the microwave solution, those individuals customers with damaged distribution lines will still be out of landline service.
- No ETTR has been provided at this time.

WEATHER OF CONCERN

Weather of Concern

- The National Weather Service has issued Red Flag Warnings for most of North and Central California valley locations beginning tonight through Sunday, 12/17/17. Gusty winds and very low relative humidity are expected to produce critical fire conditions.
 - Gusty winds and dry conditions will create critical fire weather conditions.
- High pressure over Santa Barbara will produce sundowner winds through this evening, 12/16/17. The combination of north to northeast winds and very low relative humidity will raise the fire danger to extreme.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** High Risk for strong gusty N-NE/Offshore winds both Bay Area PSAs, SW Sacramento Valley PSA, and SE Mid Coast PSA through midday Sunday ***

A cold front passed through the North Ops region overnight. Light precipitation fell in eastern areas, but clear and dry conditions prevail now. Strong gusty N-NE/Offshore winds that developed behind the front will continue through midday Sunday. The peak of the wind event is occurring this morning, with widespread gusts of 30-40 mph and localized gusts as high as 60 mph in wind-prone areas from the western Cascade-Sierra slopes to the coastal regions south of Clear Lake. Winds will continue at slightly lighter speeds later today through midday Sunday. At the same time, daytime humidity in these same areas will be 10-20%, with overnight recovery only to 20-35%. This is considered a high risk event for both Bay Area PSAs, the Sacramento Valley and Foothills PSA west of I-5 and south of Corning, and the Mid Coast PSA south of Clear Lake. The winds will diminish late Sunday, but humidity will still be fairly low in many inland areas

Another potent cold frontal passage is expected Wednesday. This system appears to have more moisture with it, but there is a chance that SW portions of the region will have high risk conditions late in the week.

SOUTHERN CALIFORNIA

Gusty north winds interior sections of the central coast/western San Joaquin Valley southward into Santa Barbara County

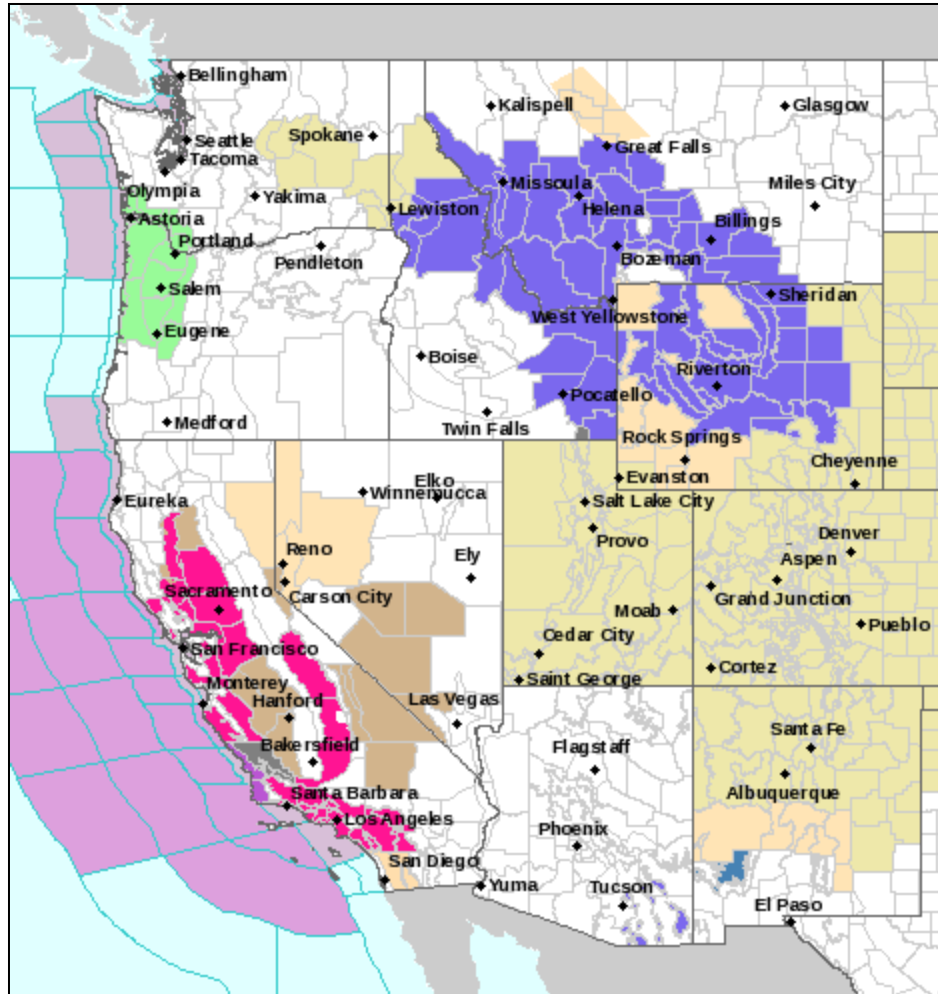

Winds turning offshore tonight, becoming gusty over Southern California by daybreak Sunday

Another strong wind event likely during the second half of next week

Strong northerly winds have developed this morning which will increase through the noon hour. During the period of maximum winds, wind speeds of 20-30 mph with gusts over 40 mph will be possible across San Benito and interior sections of Monterey County southward into eastern San Luis Obispo and northern Santa Barbara County. Minimum RH in these areas will likely be in the 10-15% range. It will also be windy over most of the high desert today where north winds will reach similar speeds this afternoon. A few clouds and even some virga will be possible today, but no precipitation will occur. Temperatures will be 10 degrees cooler with highs in the 40s and 50s in the mountains to around 70 in the lower valleys. Tonight into Sunday, the winds will turn northeast which will shift the strongest winds into Southern California. Another moderate offshore wind event is expected with winds reaching 20-30 mph with gusts to 60 mph possible by daybreak Sunday. The strongest winds may once again be over Ventura and northern Los Angeles County. Strong north winds will also continue in the deserts. Northeast winds of 15-30 mph with infrequent higher gusts will also be possible in the high Sierra on Sunday. Temperatures over Southern California will warm a degree or two and RH will fall back into the single digits. Expect the offshore winds to slowly decrease Sunday night into Monday. Winds should be light Monday night and Tuesday with a warming trend expected. Long range models show strong north winds may return Wednesday night into Thursday with another offshore wind event likely by Thursday night. No precipitation is likely through the end of the month.
